Operációs rendszerek BSc

1. Gyak.

2022. 02. 15.

Készítette:

Szelényi Szabolcs Bsc

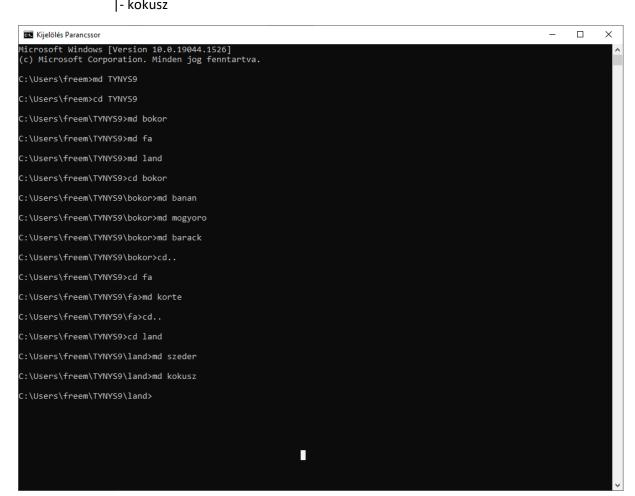

Mérnökinformatikus hallgató

TYNYS9

- 1. Készítse el a következő feladatokat! Az elvégzett feladatokról készítsen (a.)-j.)-ig.) képernyőképet, majd illessze be a jegyzőkönyvbe.
- a.) Hozza létre a következő mappa szerkezetet!

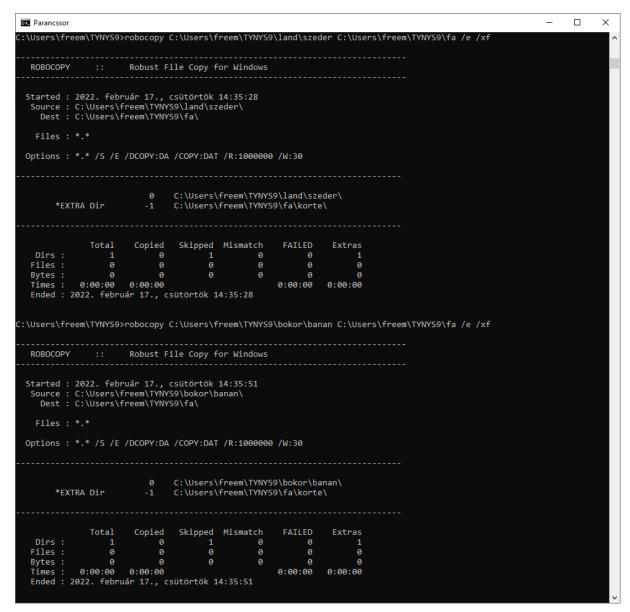

neptunkod

- bokor	
I	- banan
I	- mogyoro
I	- barack
- fa	
 -la	- korte nd
	- szeder
	Lkokucz

b.) Készítsen másolatot:

- a neptunkod/ land/szeder katalógusról a neptunkod/fa katalógusba
- a neptunkod /bokor/banan katalógusról a neptunkod /fa katalógusba

- c.) Végezze el a következő áthelyezéseket:
 - a neptunkod /bokor/barack katalógust helyezze át a neptunkod /fa katalógusba
 - a neptunkod /land /kokusz katalógust helyezze át a neptunkod/fa katalógusba

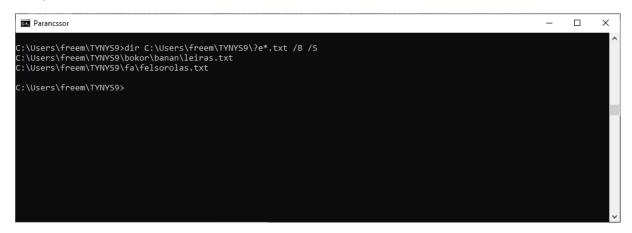

- d.) Törölje a neptunkod/land katalógust a teljes tartalmával. Hozza létre a következő szöveges állományokat:
 - neptunkod/bokor/banan/ leiras.txt
 - neptunkod/tree/felsorolas.txt
- e.) A leiras.txt szöveges állományba írjon 3 sort a barackról. A felsorolas szöveges állományba soroljon fel legalább 5 csoporttársa nevét.

```

Danda
Kazsi
Krisz
Tetya
C:\Users\freem\TYNYS9\fa>_
```

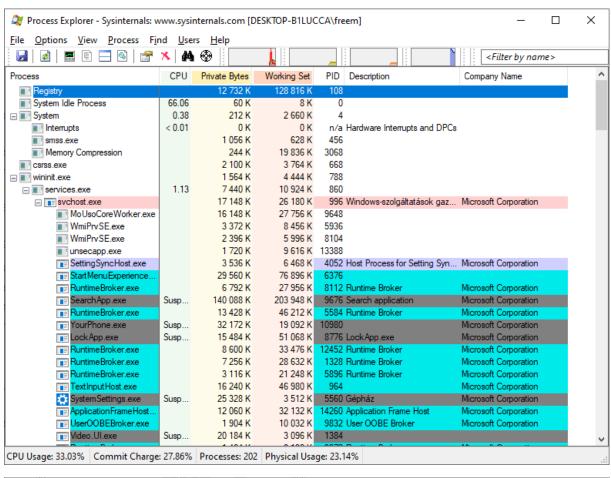

- 2. A Sysinternals weboldalán kategóriákba sorolva hasznos programok érhetők el:
 - a) File and Disk Utilities (Disk2vhd)

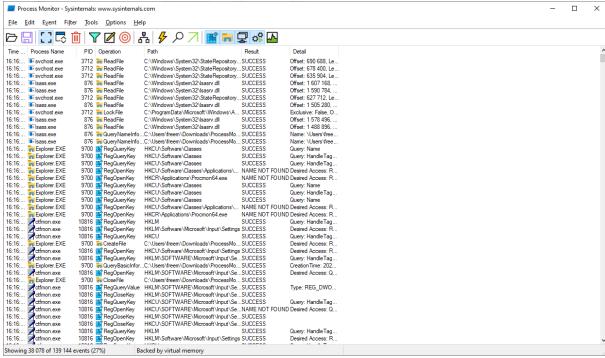

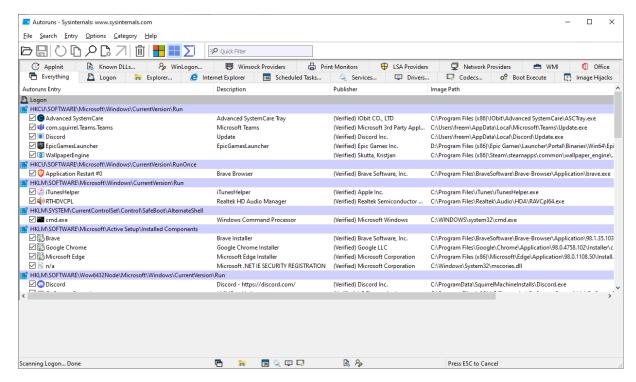

b) Networking Utilities (TCPView)

c) Process Utilities (Process Explorer, Process Monitor, AutoRuns)

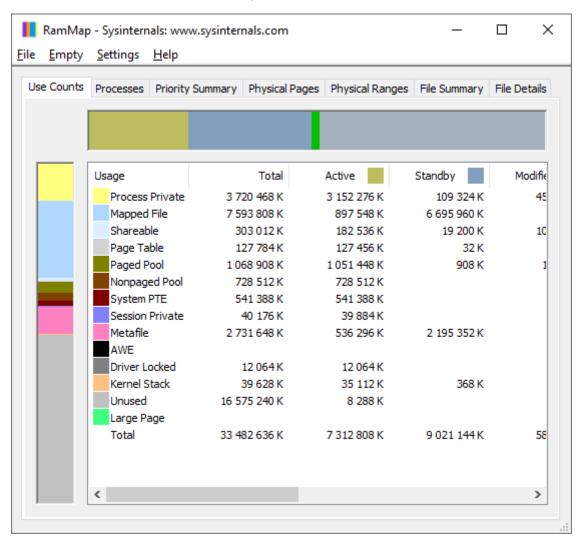

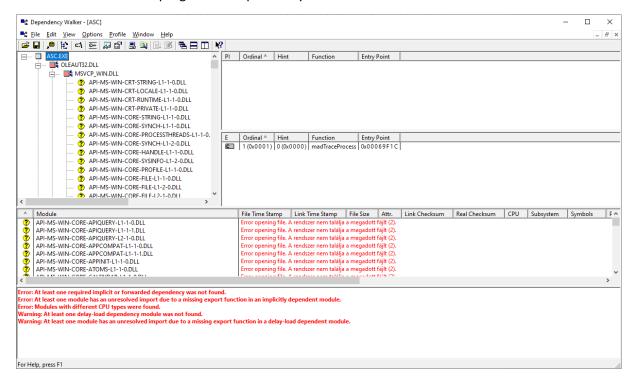

d) Security Utilities (LogonSession)

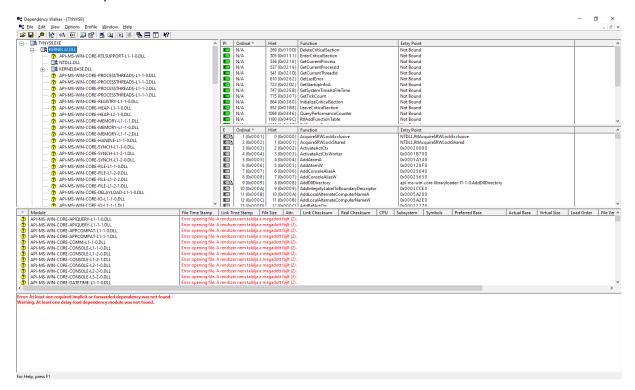

e) Information Utilities (RAMMap)

3. Töltse le a következő programot: Dependency Walker

a.) Vizsgálja meg, hogy a neptunkod.exe milyen API hívásokat használ a kernel32.dll-ből (Win alrendszer DLL)!

b.) Keresse meg NTDLL.DLL-t! Mi ennek a szerepe? Vizsgálja meg az exportált függvényeket, milyen információkat kap az NT API-ról!

Az ntdll.dll a rendszerkönyvtár, amely felelős az operációs rendszer mozgatásáért, másolásáért, összehasonlításáért és más hasonló műveleteiért.
